**macOS users:** since the application is not signed, you need to control-click the app icon and choose **Open** from the context menu the first time you run it.

### Linux

- 64-bit Linux portable zip (64-bit Mint 17+ Ubuntu 14.04+ Debian 8+ Fedora 21+ Arch/Manjaro)
- 64-bit Linux snap

On snap-enabled systems, install the beta snap from the store with: `snap install shotcut --edge --classic`

**Linux Zip file Users:** No install required, simply extract the archive and run it. You can drag the Shotcut folder to copy and move it wherever you want. If double-clicking the icon in your file manager does not launch Shotcut, open Shotcut.app, and try double-clicking the shotcut shell script. Do not try to run bin/shotcut directly. You may need to install the following dependencies from their distribution (the exact names may vary): SDL, libexif, and JACK. A number of the audio filters such
