

Uputstvo za instalaciju FreeCad programa

Da bi FreeCad preuzeli sa interneta potrebno je da otvorite link

<http://www.freecadweb.org/wiki/index.php?title=Download>

Download

There are several downloads for various operating systems available. Before downloading keep in mind:

FreeCAD is under heavy development and might not be ready for production use

Official Installers

Stable FreeCAD installers

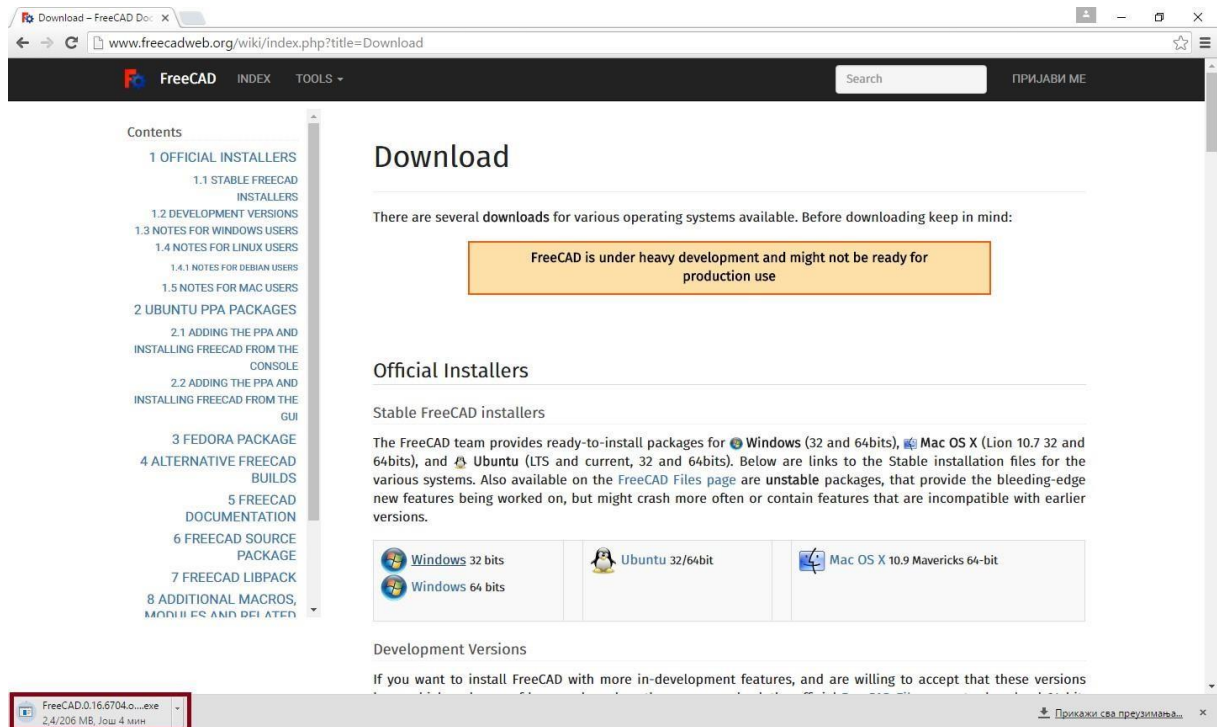

The FreeCAD team provides ready-to-install packages for Windows (32 and 64bits), Mac OS X (Lion 10.7 32 and 64bits), and Ubuntu (LTS and current, 32 and 64bits). Below are links to the Stable installation files for the various systems. Also available on the FreeCAD Files page are unstable packages, that provide the bleeding-edge new features being worked on, but might crash more often or contain features that are incompatible with earlier versions.

Windows 32 bits	Ubuntu 32/64bit	Mac OS X 10.9 Mavericks 64-bit
Windows 64 bits		

Development Versions

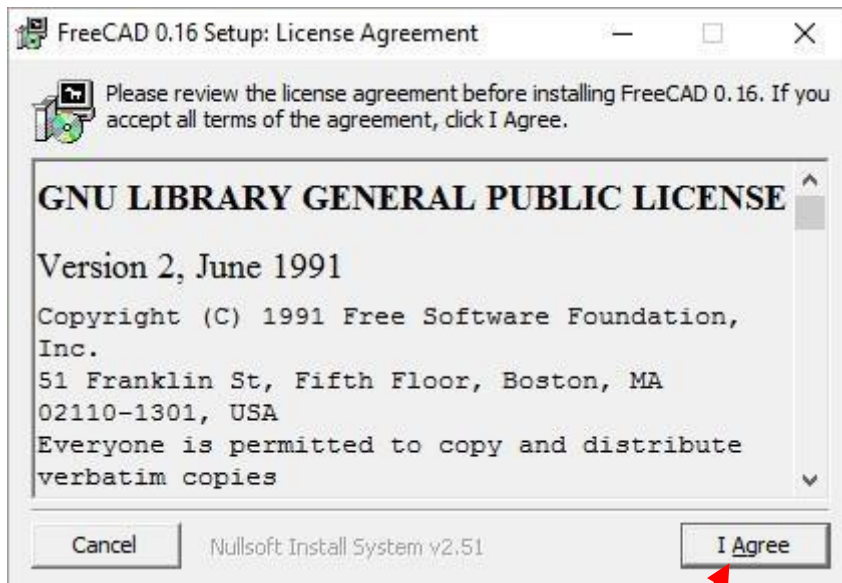

If you want to install FreeCAD with more in-development features, and are willing to accept that these versions have a higher chance of bugs and crashes, then you can check the official FreeCAD Files page to download 64 bit, older, or unstable releases. Of course, if you want to stay even more on the bleeding edge of development, you can

U otvorenom prozoru vidimo ponuđene verzije programa kompatibilne sa više različitih operativnih sistema. Birate verziju za vaš operativni sistem i time pokrećete preuzimanje programa sa interneta. U donjem lijevom uglu vam se otvara novi mali prozor, koji prikazuje status preuzimanja, kao što je prikazano na slici ispod.

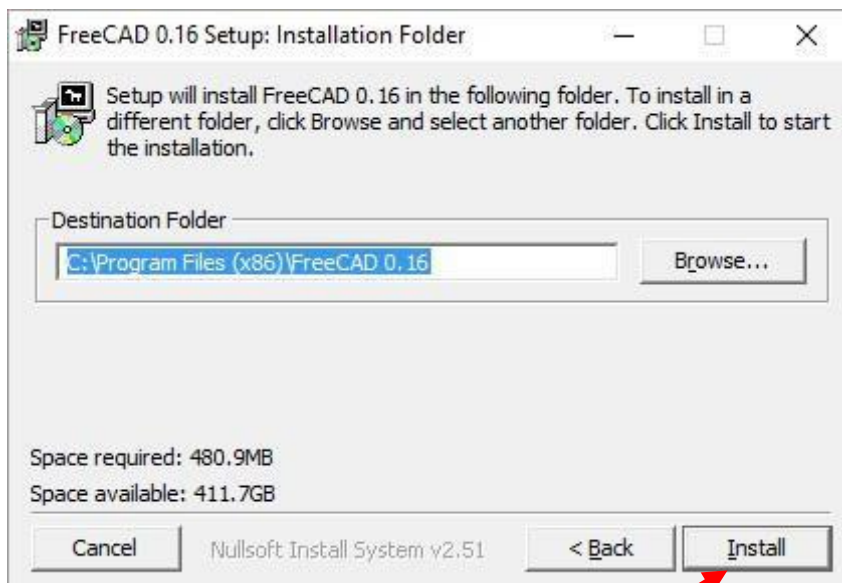

Nakon završetka preuzimanja, klikom na prozor započinjete instalaciju programa.

Kada pokrenete instalaciju pojaviće se prozor sa pitanjem: **”Do you want to allow this app to make changes to your PC?”** – kliknite na dugme **YES**, nakon čega se otvara prozor kao na slici ispod.

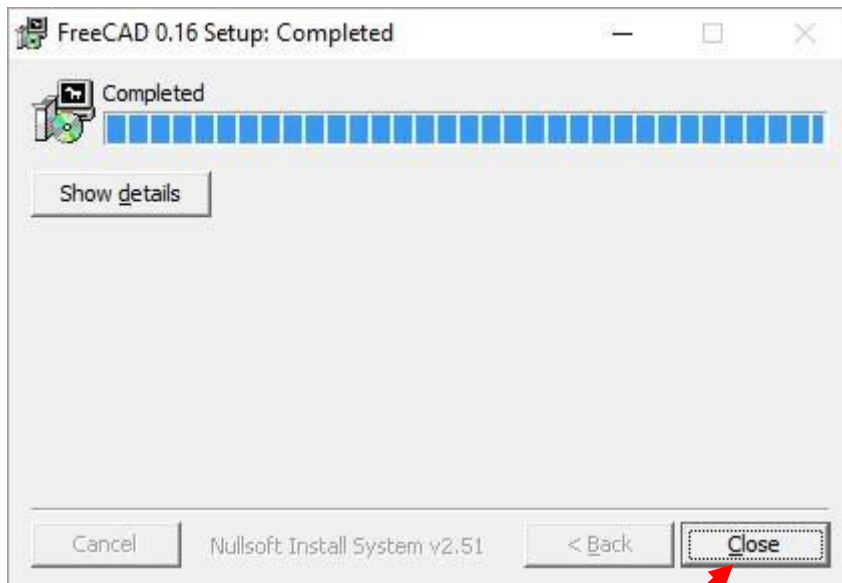

Klikom na dugme **I Agree** prihvatate dalji nastavak instalacije i otvara vam se novi prozor.

Klikom na dugme **Install** pokrećete završnu fazu instalacije.

Nakon završetka vam se otvara prozor kao na slici ispod.

Instalacija je završena, a klikom na dugme **Close** je zatvarate. Prečica za pokretanje programa se sada nalazi na vašem desktopu.
